

REFEREE DIAGONAL SYSTEM

- Referees run in a diagonal line, typically to their left.
- AR's are needed to watch the area opposite of the CR.
- Ensure that the side parent AR's are from both teams.
- Your team parent AR should be placed on your parent's side.
- The other team's AR should be placed on their team side.
- This helps eliminate opposing confrontations/disagreements.
- If you place your team as shown above you will not have an AR running in your space.
- If you have a young ref, offer to help him find and place AR's.
